WHAT IS BITBLISSCOIN

ABOUT US

WHAT IS BITBLISSCOIN?

BitBlissCoin (BIBC) is an amazon-like, kindle-like decentralized one-stop crypto-centric ebook store for people looking for sufficient, detailed and quality information on various cryptocurrency topics powered by the Blockchain technology. It operates as a decentralized Crypto eBookstore and decentralized eCommerce platform.

BitBlissCoin is a peer-to-peer- new cryptocurrency which operates like other physical currencies like the dollar but is only available in the digital world, which allows for instantaneous transactions and borderless transfer-of-ownership. All monetary transactions with BIBC are processed through secured servers, so users have no need to worry about any risks because it is user friendly and all

transactions are anonymous. With our debit card system, you can easily make payments using your smart phone.

BIBC's vision is to not only become a digital currency that can meet the highest advanced technology standards but also become the source of cryptocurrency education and the most user-friendly digital cash which can easily be used and adopted by anyone. BIBC is:

- Blockchain Technology
- Decentralised
- Peer-To-Peer Network
- Anonymous
- Cryptocurrency Education
- Non-Government Controlled
- A Platform With Lower Transfer Fees
- A Platform With Multiple Investment Opportunities

PROBLEMS

DEMERITS OF TRADITIONAL MONEY TRANSACTION METHODS

THESE ARE SOME OF THE DISADVANTAGES THAT EXIST IN PRESENT TRADITIONAL TRANSACTION METHODS:

LOW INTEREST:

Brick-and-mortar financial systems like banks are notorious for their lower interest rates on users' savings/investment accounts. And they can actually provide higher rates but they don't.

HIGH FEES:

With traditional methods, transferring funds across nations are expensive and filled with hurdles for users.

TIME LIMITATIONS:

Banks are open from 9:00 to 5:00 p.m. But, we may have an emergency to make a payment at 11:00 p.m. That's a costly inconvenience.

TIME-CONSUMING:

It is time-consuming and stressful to use traditional methods when moving money between different banks, different nations, paying bills and more. Time is a precious commodity.

**"2.5 BILLION ADULTS

**THE WORLD
BANK**

THE UNBANKED

HERE ARE SOME OF THE DISADVANTAGES:

2.2 billion of the unserved adults live in developing economies of Africa, Asia, Latin America, and the Middle East.

LACK OF LITERACY:

Some unbanked and underbanked consumers are cautious due to their lack of understanding about banks, rates, lack of IDs, low income and illiteracy of the benefits of maintaining an account.

INCONVENIENCE:

Some of the unbanked adults say their communities don't have enough nearby bank branches for them to use.

THE NEED FOR FINANCIAL LITERACY IN CRYPTOCURRENCY

“NEARLY TWO-THIRDS OF AMERICANS COULDN’T PASS A BASIC FINANCIAL LITERACY TEST”... NATIONAL CAPABILITY STUDY, CONDUCTED BY THE FINRA FOUNDATION.

In the last 24 months, the world of cryptocurrencies has become very, very exciting with the year 2017 recording all-time high on the interest in cryptocurrencies.

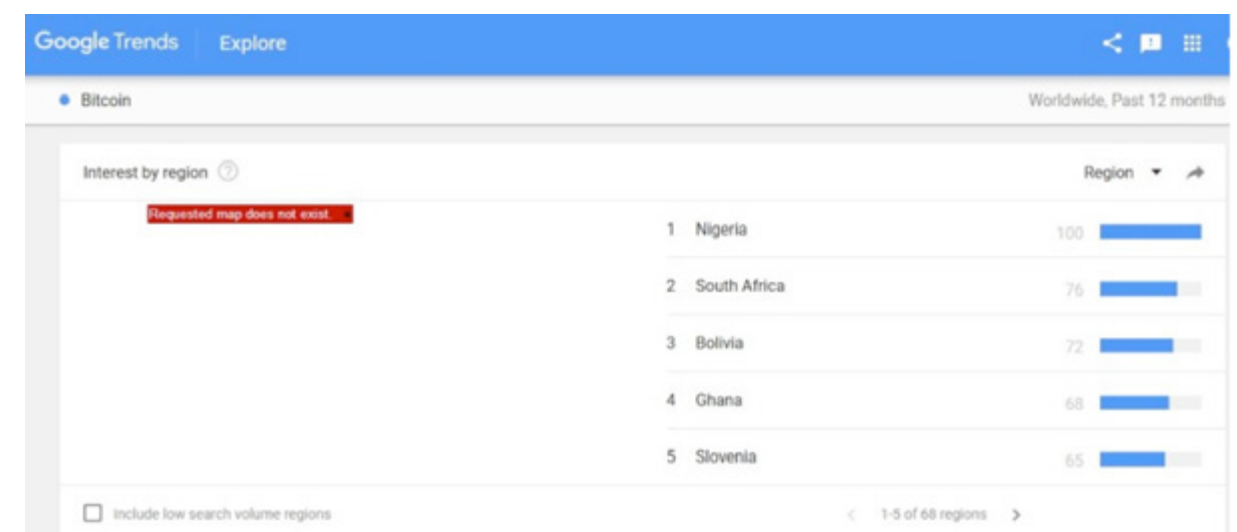

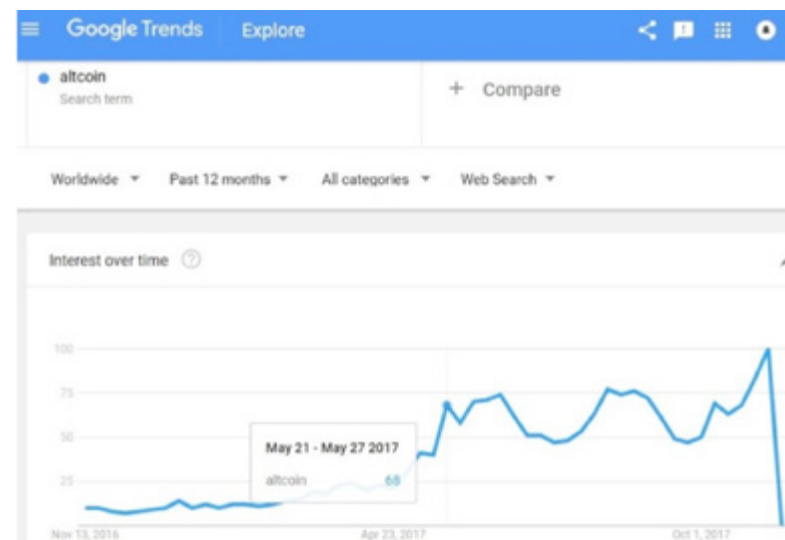

People across borders have become aware of the massive opportunities in the crypto space, which has generated the huge demand for cryptocurrency education.

For instance, according to Google Trends, the month of May 2017 and October 2017 saw a record-breaking number of Google searches for “Bitcoin” and “Altcoin”.

THERE IS A HOT DEMAND FOR QUALITY INFORMATION ON CRYPTOCURRENCIES WHICH THE WORLD HAS NEVER BEFORE SEEN ACROSS CONTINENTS, ESPECIALLY IN AFRICA, ASIA, UNITED KINGDOM AND AMERICA.

NB: Google Trends is a public web facility of Google Inc., based on Google Search, that shows how often a particular search-term is entered relative to the total search-volume across various regions of the world, and in various languages.

This kind of trend shows that interest in digital currencies and their uses have reached an all-time peak and many new entrants into the crypto space would welcome any kind of knowledge on it to avoid mistakes.

KEY FEATURES OF THE BITBLISSCOIN APPLICATIONS

VALUABLE

The moment you acquire BitBliss Coin (BIBC) it becomes an interest bearing asset.

FAST TRANSACTIONS

Send and receive payments anywhere in the world quickly in seconds. BIBC is even faster than Bitcoin as you need a minimum of just 4 confirmations with our blockchain technology. This allows for unparalleled speed for conventional remittance and payment systems.

DECENTRALIZED

Transfers from peer-to-peer makes use of decentralized blockchain transaction technology, so no centralized third parties or servers.

THE NUMBER OF COINS IS LIMITED

Like Bitcoin and other leading cryptocurrencies, BitBliss Coin (BIBC) has a fixed monetary supply of 38.5 million. BIBC is a deflationary currency, and because of the limited supply, the price of BIBC is expected to rise when demand is high and the number of coins that remain is not increased as seen with the case of Bitcoin.

BLOCKCHAIN SECURITY

The BitBliss Coin network is secured against attacks. The POW/POS system provides the perfect way to secure the BitBliss Coin network and keep it decentralized. Your transaction cannot be interfered with under any circumstances.

LOW TRANSFER FEES

Transfer fees are very, very small, almost negligible across the globe and can be done with a smartphone or PC and an internet connection in seconds, whenever and wherever you want.

ANONYMOUS

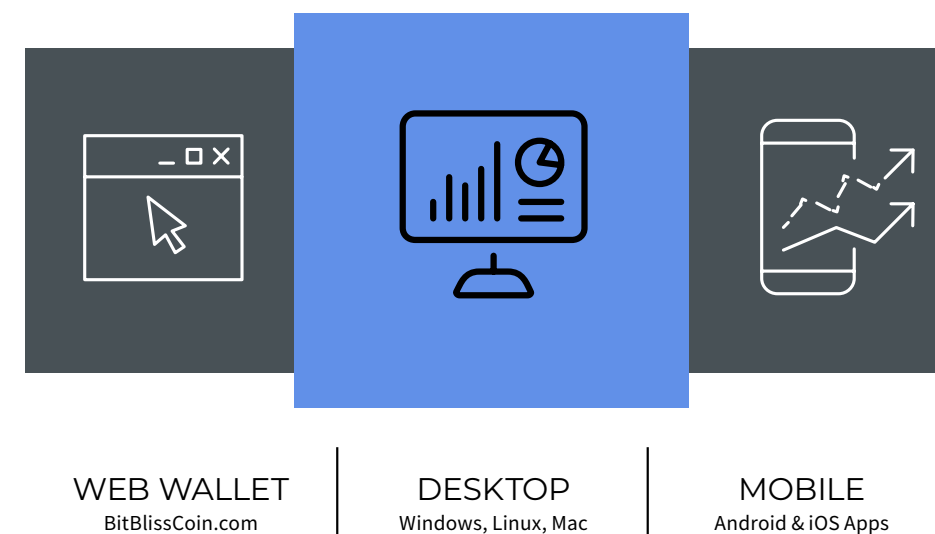

All the BitBlissCoin transactions are private. Every BitBlissCoin user can see every transaction in the blockchain. It's public for everyone. But it is not shown which transaction is done by whom unless the user chooses to. This new advanced blockchain technology revolutionizes the whole financial system, although anonymous all users' transactions are recorded and can be monitored through blockchain.

DIFFERENCE BETWEEN BITCOIN AND BITBLISS COIN

In the world of cryptocurrencies, Bitcoin and BitBlissCoin (BIBC) are not much different; the difference is Opportunity and Price. To have one Bitcoin, you have to prepare more than \$6,000 as at the time of this write-up, but BitBlissCoin has a bigger opportunity for any individual right now ... because the price is still very cheap and you also have chance for the price at the initial coin offering (ICO) which can never be gotten for Bitcoin

THREE REASONS WHY

YOU SHOULD INVEST IN BITBLISSCOIN DURING THE ICO

1. LIMITED OFFER

All coins will be issued only during ICO. This is coded in the BIBC Smart Contract, therefore it is 100% guaranteed by decentralized blockchain protocol.

2. CONSTANT DEMAND

All BitBlissCoin solutions require BIB Coins for usage and the amount of coins in circulation will constantly decrease, thus demand will constantly be on the increase. The BIB Coin is the fuel for BitBliss transaction processing.

3. HUGE RETURN ON INVESTMENT

In the last two quarters of 2017, the world of cryptocurrencies has become very, very exciting. Interest in cryptocurrencies has reached an all-time high as people around the globe become more aware of the crypto world. Major exchanges have reported exponential growth as thousands of people flock to their platforms.

Cryptocurrencies are at its beginning, we have not scratched the surface yet. Imagine if you had the opportunity to invest in Apple, Google or Facebook... at its beginning, you would have been a millionaire by now.

Even blue chip banking giant; Goldman Sachs (the most famous investment bank in the world) has recently seen the huge opportunities in cryptocurrencies and is now building a trader team for it.

Bitcoin price was less than \$0.01 in May 2010 and is above \$6,000 today. If you invested only \$100 in Bitcoin then, you would have over \$60,000,000 in your wallet today!

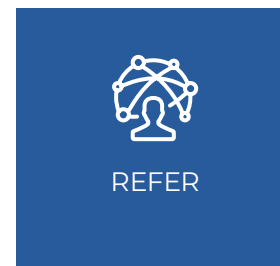

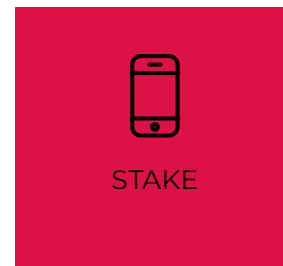

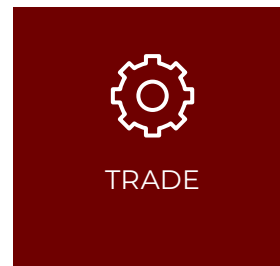

If you missed out with Bitcoin, with BitBlissCoin you AGAIN have a once-in-a-lifetime opportunity to be part of this financial revolution from the beginning when its price is still very low.

Cryptocurrencies give you a great opportunity to invest in a field that is revolutionizing the world. Those who invest very early will likely be very successful, like the ones who did with Internet companies.

HOW TO GET RETURN ON INVESTMENT AFTER THE ICO

After ICO ends, an internal trading platform will be open so that users can buy and sell BitBliss Coins. With this, you have different opportunities to earn a great profit both in the long and short term. You could either hold your coins for staking or sell it to earn a profit.

You can earn with BitBliss Coins in 5 Ways:

HOW TO EARN PROFIT WITH TRADING

STEP 1 //
REGISTER YOUR ACCOUNT AT WWW.BITBLISSCOIN.COM

STEP 2 //
DEPOSIT BITCOIN (BTC) AND THEN YOU CAN BUY BITBLISSCOINS (BIBC)

STEP 3 //
START TRADING WITH BIBC AND EARN PROFIT

**YOU CAN
TRADE BIBC
ON BIBC
EXCHANGE
OR OTHER
EXCHANGES,
ESPECIALLY
WITH OUR
PARTNERS.**

HOW TO EARN PROFIT WITH STAKING

STEP 1 //
REGISTER YOUR ACCOUNT AT WWW.BITBLISSCOIN.COM

STEP 2 //
DEPOSIT BITCOIN (BTC) AND THEN YOU CAN BUY BITBLISSCOINS (BIBC)

STEP 3 //
DEPOSIT BIBC IN LINUX, WINDOWS OR MAC WALLET, AND YOUR PROFIT DEPENDS ON THE QUANTITY OF BIBC DEPOSITED. THE MORE YOU DEPOSIT, THE HIGHER YOUR PROFIT.

STEP 4 //
HOLD BITBLISS COIN FOR A MINIMUM OF 15 DAYS TO EARN PROFIT WITH STAKING.

If you have BitBliss Coin that you are not involved in trading then you should be involved in staking. This means that if you just hold your coin in your wallet over time, and your coins are not used for staking, you could miss substantial benefit.

BitBliss Coin's blockchain technology will give you bonus you when you hold your coin and used for staking. The more you hold BIBCs, the more bonus you earn from staking.

STAKING PROFIT INTEREST:

April 2018 - July 2018: 10% per month
August 2018 - December 2018: 8% per month
January 2019 - June 2019: 6% per month
July 2019 - December 2019: 5% per month
January 2020 - June 2020: 3% per month
July 2020 - December 2020: 1.5% per month

HOW TO EARN PROFIT WITH MINING

Mining BitBliss Coin gives you more profit when you invest in hardware (CPU/GPU) and using POW to mine BitBliss Coins. With each block being mined you will get 55 BIBC, you can choose between solo mining or pool mining.

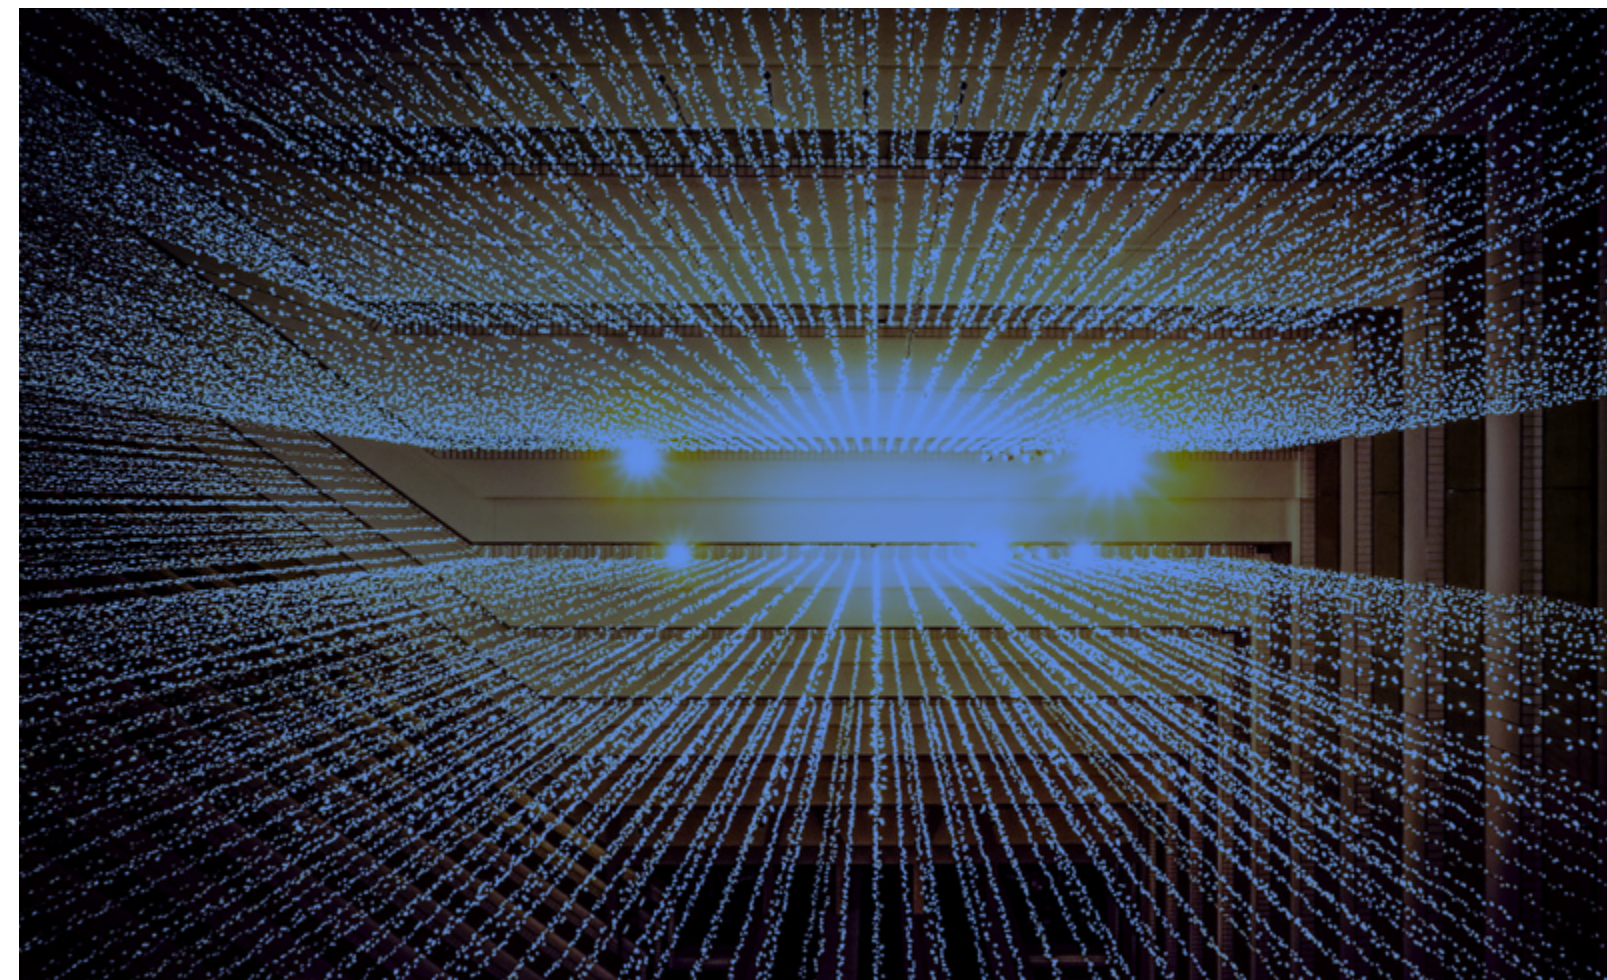

STEP 1 //
BITBLISS COINS CAN BE MINED WITH CPU/GPU
